

The **CSS Informatics Senior Technical Consultant or Principal Technical Consultant, OLS Services** will install, upgrade, migrate, patch, and support the Oracle Life Sciences (OLS) suite of products (Oracle Clinical (OC), Remote Data Capture (RDC), Thesaurus Management System (TMS), and Oracle Adverse Event Reporting System (AERS)), Oracle RDBMS, and other clinical data management and/or safety applications as appropriate, for both client and internal implementations. These responsibilities include developing installation checklist for application installations, upgrades, migrations, etc., for the said applications, in a timely and accurate manner.

This position will be required to provide technical support to client and internal staff on applications, databases, ASP (hosting) services, and any other applications or system as appropriate. Programming and development skills are a plus for internal product development, support, or potential client projects. This position will have a moderate degree of autonomy and will work under the supervision of the Director, Product Development and Information Technology, and with the project managers(s) for client and internal projects.

Senior Consultant position requirements:

Education and experience

- Bachelor's Degree
- Minimum 3 to 5 years of pharmaceutical, biotech, or consulting computer software technical experience within the clinical data management and/or safety area
- Minimum 3 to 5 years of Oracle Clinical, RDC, TMS, and/or Oracle AERS technical experience
- Minimum 2 to 4 years of Oracle DBA experience
- Minimum 3 to 5 years of SQL*Plus and PL/SQL experience

Knowledge, Skills and Abilities:

- Knowledge about computer systems validation, 21 CFR Part 11, and system testing processes
- Proven technical troubleshooting and problem solving skills
- Excellent written, oral and interpersonal skills
- Time management skills
- Competent with MS Word and MS Excel
- Native or fluent English

- Confident, self-motivated, and creative

Principal Consultant position requirements:

Education and Experience:

- Bachelor's Degree
- Minimum 6 to 8 years of pharmaceutical, biotech, or consulting computer software technical experience within the clinical data management and/or safety area
- Minimum 6 to 8 years of Oracle Clinical, RDC, TMS, and/or Oracle AERS technical experience
- Minimum 5 to 7 years of Oracle DBA experience
- Minimum 6 to 8 years of SQL*Plus and PL/SQL experience

Knowledge, Skills and Abilities:

- Knowledge about computer systems validation, 21 CFR Part 11, and system testing processes
- Proven technical troubleshooting and problem solving skills
- Excellent written, oral and interpersonal skills
- Time management skills
- Competent with MS Word and MS Excel
- Native or fluent English
- Confident, self-motivated, and creative

Hiring Preferences:

Education and Experience:

- Active in pharmaceutical user groups such as Oracle Clinical User Group (OCUG)
- Active in Oracle Database User Group

Knowledge, Skills and Abilities:

- Database administration skills
- Professional consulting experience
- Installation, upgrades, data migration, and/or software development experience
